

Website Cookie Policy: Version 1. Effective 01.09.2026.

This policy explains how Sixty Learn Ltd ("Sixty", "we") uses cookies on www.sixtylearn.com. It should be read with our Privacy Policy. It covers our website only; our learning platform at app.sixtylearn.com has its own cookie information, which you can find on its sign-in page.

1. What cookies are

Cookies are small text files placed on your device when you visit a website. They are either set by us (first-party) or by another organisation whose service we use (third-party), and last either for your visit (session) or for a set period.

2. How we use them

Our website uses only strictly necessary cookies. These are needed to make our contact form work and keep it secure, so the law does not require your consent for them and we do not show a cookie banner. We do not use analytics or advertising cookies on our website. If we add any non-essential cookies in future, we will ask for your consent first and update this policy.

3. The cookies we use

Cookie	What it does	Duration	Type
sixty-session	Keeps your browsing session. It lets our forms work properly, protects them against forgery and lets us show you confirmation or error messages after you submit one. It contains a random session identifier and no personal information.	Expires after 2 hours of inactivity	Strictly necessary, first-party, HTTP-only
XSRF-TOKEN	A security token that protects our website against cross-site request forgery, where another site tries to submit a request on your behalf without your knowledge. It contains an encrypted random value and no personal information.	Session (deleted when you close your browser)	Strictly necessary, first-party

4. Spam and bot protection

Our form uses Cloudflare Turnstile to check that submissions come from a real person and not an automated bot. When you load a page containing a form, your browser connects to Cloudflare (challenges.cloudflare.com) and runs a short check. Cloudflare may receive technical information such as your IP address and browser characteristics to make that decision. Turnstile does not set cookies on your device. Cloudflare processes this information under its [privacy policy](#).

5. Managing cookies

You can block or delete cookies in your browser settings. Blocking the strictly necessary cookies above may stop our contact form working properly. The ICO's guidance at ico.org.uk and the site aboutcookies.org explain how to do this in common browsers.

6. Changes and contact

We may update this policy as the cookies we use change, and will show the date of the latest version at the top. Questions about cookies can be sent to hello@sixtylearn.com.
